Edging

Edging

Our garden edging makes it easy to create borders, gravel paths and lawn edges in any garden. This versatile product has many uses. Combine it with other elements made from the same material to create a cohesive garden look.

Material corten steel

Our edging can be used in many ways, for example, to create neat lawns or gravel paths. We have several edging options: straight, set and folded. 2 and 3 mm straight edging and 3 mm folded edging is flexible and can be curved. For larger projects, this edging can also be custom made.

Corten steel has an orange-brown colour, the result of a natural rust layer. Another name for corten steel is weathering steel: weather conditions have a positive effect on this material.

Corten steel is a metal alloy made by adding copper, phosphorus, silicon, nickel and chromium to iron. When exposed to air, the material forms a protective layer of rust. This natural coating prevents further corrosion, so the edging will last for many years.

SPECIFICATIONS

- 5-year guarantee.
- Corten steel lawn edging is hard-wearing, weatherproof, low-maintenance and durable.
- The corten steel has a standard thickness of 2 or 3 mm.
- Our edging is available in six heights: 70, 100, 150, 200, 290, and 390 mm.
- Each edging strip has a length of 2300 mm.
- Edging is supplied in packs of 10, 20 or 40 strips.
- The strips can also be provided with optional pre-drilled mounting holes.
- This product can be customised for larger projects.
- Products are delivered without rust. The corten steel rusting process takes about 4-5 months, depending on weather conditions.
- The rust can be fixed by applying Owatrol. This is a penetrating rust inhibitor that forms a protective anti-rust coating. Owatrol protects the edging and stops the rust on corten steel flaking off.

KEY POINTS TO NOTE

- Products should be unpacked immediately upon receipt to release any moisture trapped inside the packaging. If the product is left in its packaging, it may develop uneven rust patches.
- We do not recommend using corten steel within 2 km of a coastline.
- The weathering process may cause rust run-off.
- Clean annually by hosing off dirt with clean tap water.

Material galvanised steel

Our edging can be used in many ways, for example, to create neat lawns or gravel paths. We have several edging options: straight, set and folded. 2 and 3 mm straight edging and 3 mm folded edging is flexible and can be curved. For larger projects, this edging can also be custom made.

The hot-dip galvanised material ensures that the edging is corrosion resistant and will last outdoors for decades. Hot-dip galvanising involves immersing the metal in a bath of molten zinc. This prevents the edging from rusting and creates a protective layer over the metal.

SPECIFICATIONS

- 5-year guarantee.
- Galvanised steel edging is very strong, impact resistant, weatherproof and durable.
- The standard thickness of the galvanised steel is 2 or 3 mm.
- Our edging is available in six heights: 70, 100, 150, 200, 290, and 390 mm.
- Each edging strip has a length of 2300 mm.
- Edging is supplied in packs of 10, 20 or 40 strips.
- The strips can also be provided with optional pre-drilled mounting holes.
- This product can be customised for larger projects.

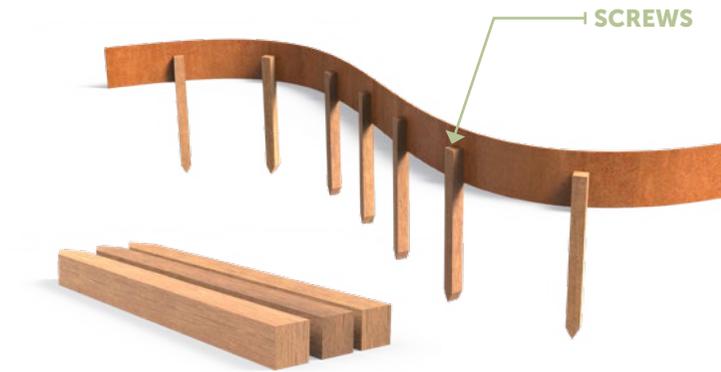

KEY POINTS TO NOTE

- Products should be unpacked immediately upon receipt to release any moisture trapped inside the packaging. If the product is left in its packaging, it may develop patches of uneven discolouration.
- Clean annually by hosing off dirt with clean tap water.

Placement

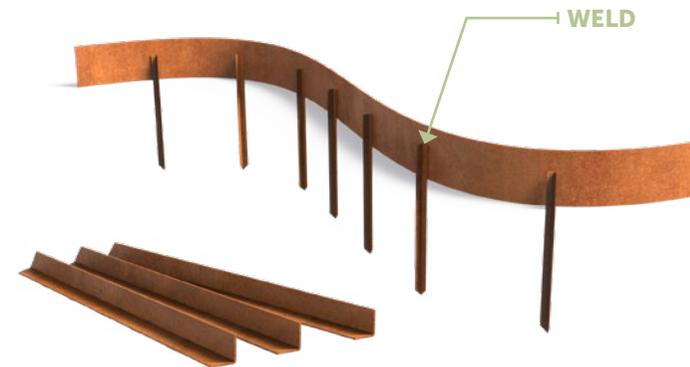

SCREWS

1. Place hardwood pegs to determine the shape of the edging.
2. As additional, the edging can be ordered with pre-drilled holes so the pegs are easy to screw on. Screws are therefore included.
3. Head size of the hardwood pegs is 50x50 mm. Pegs can be ordered in different heights of 400, 600 and 800 mm. The pegs are delivered in packs of 20 pieces.

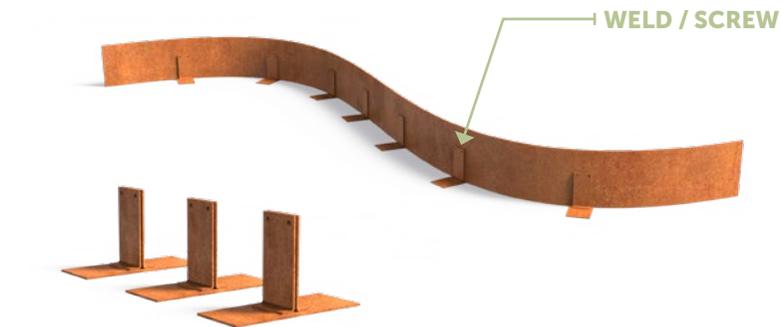

WELD

1. Place corten steel pegs to determine the shape of the edging
2. Weld the corten steel edging in a flowing shape to the pegs.
3. Head size of the corten steel pegs is 30x30 mm and have a height of 600 mm. The pegs are delivered in packs of 20 pieces.

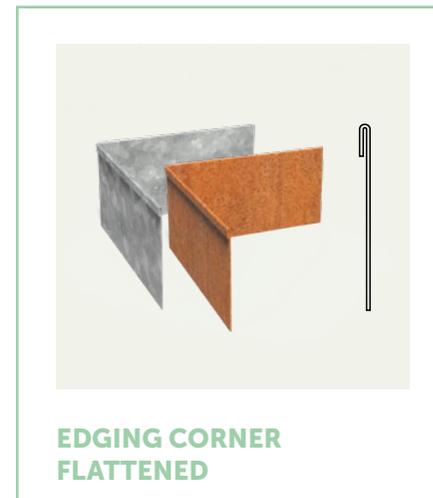

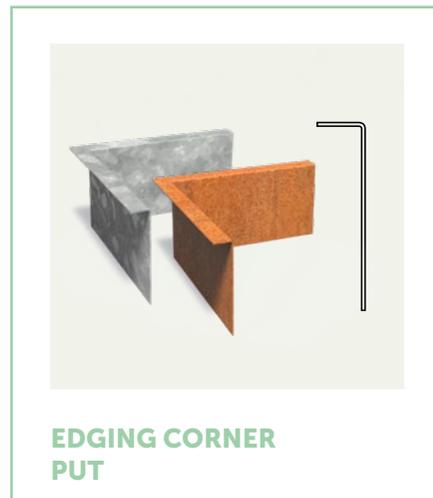

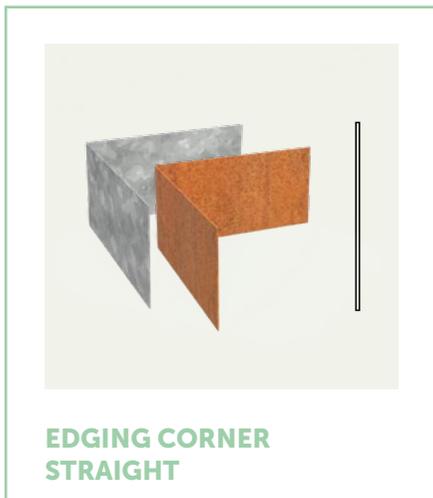

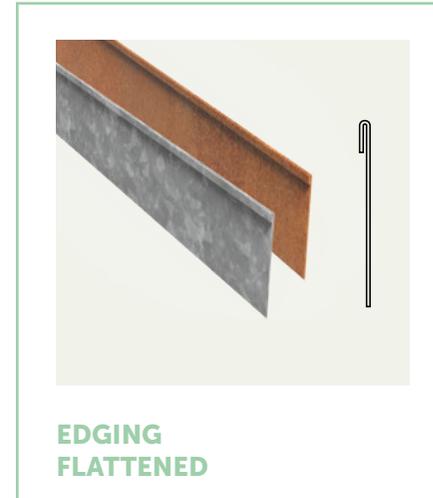

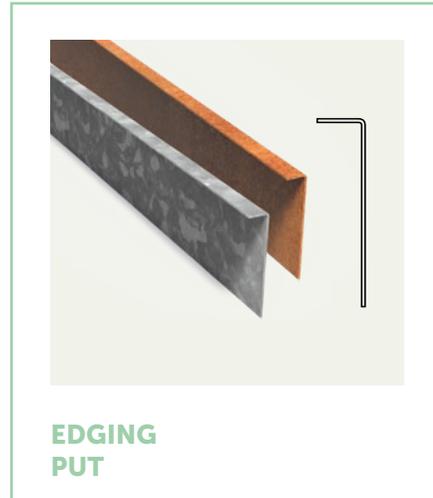

WELD / SCREW

1. Place corten steel roof support to determine the shape of the edging.
 2. Weld or screw the corten steel edging in a flowing shape to the roof support. (Screws or rivets are not provided by us).
- Note!** Roof supports can only be used in combination with 2 and 3 mm thick edging.

Models

For a complete overview of all our products and specifications, please visit www.adezz.com.

Accessories

All our accessories meet the highest standards and are a highly suitable addition to our products. Visit www.adezz.com for a complete overview of our accessories.

RUST ACCELERATOR

Our corten steel products are delivered un-rusted and the weathering process will take approximately 4-5 months. This process can be accelerated with the BIO rust accelerator available on our website. Always read the descriptions on the packaging carefully before use.

CORTEN VARNISH

Corten varnish can be applied to the corten steel products to stop the weathering process. Always read the descriptions on the packaging carefully before use.

ADEZZ

DESIGN TO GROW

Spending time outdoors has soared in popularity over the last few years, becoming an increasingly important part of our daily lives. Our brands ADEZZ, FORNO and FURNS offer a diverse range of products guaranteed to enhance the outdoor experience. Our collections create an ambience in which you can enjoy your garden to the fullest.

All brands have their own character, but they are designed to work together, allowing you to create endless combinations. The materials, finishes and styles are repeated across the collections so that they coordinate beautifully. The result? A long-lasting, stylish garden design: from sleek edging to exclusive furniture and from sturdy fireplaces to elegant water tables.

We design and manufacture all our products in-house, ensuring that we can continue to provide the high quality that you have come to expect from us. And we do this at the most competitive price possible. All our products are made in Europe with the utmost care, so we can be sure that they meet our exacting standards.
