

The TORO litter bin is made of steel.

The KTO137 model has a roof, an ashtray, a galvanized steel insert with a capacity of 30 liters and a perforated sheet finish.

TORO is a simple and modern collection of street furniture. The number of elements used has been reduced to a minimum, using the support of a steel flat bar as the structure and supporting frame for the wooden elements.. The curves of the TORO furniture elements increase their strength and give the whole a soft, friendly character.
