HOBBY FLOWER
SIDEN 1974
SINCE 1974

Historien vår begynte i 1974, da vi sammen med biologisk institutt ved Universitetet i Barcelona utviklet og patenterte Hobby Flowers selvvanningssystem.

Takket være systemets pålitelighet og gode funksjon har vi arbeidet med å videreutvikle designet i takt med nye trender innen arkitektur og interiør, og skape grønne miljøer som passer inn overalt.

Slik forener Hobby Flower kvalitet, innovasjon, design og miljøhensyn for å bringe naturen nærmere menneskene.

Our history dates back to 1974, when together with the University of Biology of Barcelona, we developed and patented the Hobby Flower self-watering system.

Thanks to its reliability and optimal performance, our efforts have focused on evolving its design, adapting it to new trends in architecture and interior design, and creating green spaces capable of integrating into all types of environments.

Thus, Hobby Flower combines quality, innovation, design, and ecology to bring nature closer to people.

MADE IN BARCELONA

BARCELONA: DESIGN OG PRODUKSJON

Barcelona: design and manufacturing

Vi ble grunnlagt i Barcelona, og kunne ikke ha valgt et bedre sted å utvikle produktene våre.

Sammen med anerkjente designere tar vi vare på hver detalj – fra utforming og holdbarhet til førsteklasses overflater – for å tilby produkter av høy kvalitet som passer inn i ethvert miljø.

We were born in Barcelona, and we couldn't have chosen a better place to create our products.

Working alongside prestigious designers, we take care of every detail: from design to durability and excellence in finishes to offer top-quality products adapted to every environment.

HÅNDVERKSPROSESSER

Handmade processes

I tråd med filosofien vår lager Hobby Flower alle produkter for hånd, med håndverksmetoder som sikrer høyest mulig kvalitet i materialer og overflater.

Following our philosophy, in Hobby Flower we manufacture all the products through manual and craft processes to achieve the highest quality in finishes and materials.

DESIGNERE

DESIGNERS

ESTUDIO MANEL MOLINA

Manel Molina studerte interiørdesign ved Escola d'Art i Disseny EINA i Barcelona. Mellom 1985 og 1989 arbeidet han som industridesigner hos Miguel Milà Studio og samarbeidet med FCO. Llorens om arkitektur- og interiørdesignprosjekter, samt restaureringsarbeid og midlertidige designprosjekter. I 1991 var han med på å grunnlegge designstudioet Lievore Altherr Molina, som spesialiserer seg på møbel-, produkt- og interiørdesign. I 2016 startet han et nytt kapittel med etableringen av Estudi Manel Molina sammen med sine samarbeidspartnere Raimon Monsarro, Daniel Castro og Blanca Roigé. Teamet arbeider med kjente merkevarer som Enea, Bover, Expormim, Studio TK, Punt Mobles og Treku, blant andre.

Manel Molina studied interior design at the Escola d'Art i Disseny EINA in Barcelona. Between 1985 and 1989, he worked as an industrial designer at the Miguel Milà studio and collaborated with the firm FCO. Llorens on architecture and interior design projects, as well as on restoration and temporary design works. In 1991, he co-founded the design studio Lievore Altherr Molina, specialising in furniture, product, and interior design. In 2016, he began a new chapter with the creation of Estudi Manel Molina together with his collaborators Raimon Monsarro, Daniel Castro, and Blanca Roigé, the team works with well-known brands such as Enea, Bover, Expormim, Studio TK, Punt Mobles, and Treku, among others.

SANNA VÖLKER

Sanna Völker er en svensk designer og kreativ leder basert i Barcelona, som arbeider med samlerdesign, interiør og konsepter innen hotell- og restaurantbransjen. Gjennom sin tverrfaglige praksis utvikler hun prosjekter som beveger seg sømløst mellom produktdesign, romlig historiefortelling og merkevarebaserte miljøer. Arbeidene hennes utforsker spenningen mellom ulike materialer, ofte med utgangspunkt i håndverk og kontekstuelle fortellinger, og balanserer det rå med det raffinerte. Hun underviser også ved ledende designinstitusjoner i Barcelona og arbeider med fremtids- og trendforskning knyttet til fremtidens urbane hjem, bærekraft og nye måter å bo og leve sammen på. Tilnærmingen hennes er preget av utforskning, samarbeid og en sterk forståelse for materialer, atmosfære og kulturell kontekst.

Sanna Völker is a Barcelona-based Swedish designer and creative director working across collectible design, interiors, and hospitality concepts. Through her hybrid practice, she develops projects that move fluidly between object design, spatial storytelling, and brand-driven environments. Her work explores material tension - often rooted in craft and contextual narratives - balancing rawness and refinement. She also teaches at leading design institutions in Barcelona and engages in foresight and trend research focused on the future of urban domestic life, sustainability, and evolving forms of living together. Her approach is driven by exploration, collaboration, and a strong sensitivity to material, atmosphere, and cultural context.

EMILIANA DESIGN STUDIO

Emiliana Design Studio ble grunnlagt på slutten av 90-tallet av Ana Mir og Emili Padrós, som nylig hadde fullført sin mastergrad i design ved Central Saint Martins School of Art & Design i London. Helt fra starten har studioet vært kjennetegnet av en tverrfaglig tilnærming til design. Dette har gjort det mulig for studioet å utvikle en variert, solid og innholdsrik karriere. Aktiv involvering av brukeren, søken etter et poetisk uttrykk og bruken av en særegen sans for humor er blant de sentrale kjennetegnene som går igjen i Emilianas prosjekter.

Emiliana design studio was founded at the end of the 90's by Ana Mir and Emili Padrós, who had recently achieved their MA in Design at London Central Saint Martins School of Art & Design in London. Since the beginning the studio is characterized for promoting a multidisciplinary approach to design practice, this fact has allowed the studio developing a diverse, solid and rich career. The active involvement of the user, the search for a poetic gesture and the use of a particular sense of humour, are among the essential aspects that emerge in the projects of Emiliana.

JORDI VILARDELL

Jordi Vilardell Iglesias startet sin profesjonelle karriere i 1983 i et selskap innen teknisk belysning, kort tid før han fullførte studiene ved La Llotja School of Design. Etter flere år som produksjef startet han i 1998 en ny fase som selvstendig designer, der han utviklet dekorative, tekniske og arkitektoniske belysningsprosjekter, samt produkter for ulike sektorer som hage og medisinsk utstyr. I ti år kombinerte han sitt profesjonelle arbeid med undervisning i 3D-modellering og foredragsvirksomhet. Arbeidet hans kjennetegnes av teknisk tilpasningsevne, kreativitet og eksperimentering med innovative materialer og løsninger.

Jordi Vilardell Iglesias, began his professional career in 1983 at a technical lighting company, shortly before completing his studies at the La Llotja School of Design. After several years working as a product manager, in 1998 he started a new phase as an independent professional, developing decorative, technical, and architectural lighting projects, as well as products for various sectors such as gardening and medical equipment. For ten years, he combined his professional activity with teaching 3D modeling and giving conferences. His work stands out for its technical adaptability, creativity, and experimentation with innovative materials and solutions.

MERITXELL VIDAL

Meritxell Vidal har utdanning i industridesign og interiørdesign fra designskolene Llotja og Deià i Barcelona. Hun arbeider profesjonelt innen områder knyttet til interiør, arkitektur og midlertidige installasjoner. Hun samarbeider om tverrfaglige prosjekter, underviser på spesialiserte kurs og holder foredrag ved designskoler og utdanningssentre. Siden 2008 har hun utviklet prosjekter sammen med Jordi Vilardell for ulike selskaper.

Meritxell Vidal, with a degree in Industrial Design and Interior Design from the Higher Design Schools of Llotja and Deià in Barcelona, she develops her professional activity in sectors related to habitat, architecture, and ephemeral installations. She collaborates on multidisciplinary projects and teaches specialized courses and gives lectures in design schools and training centers. Since 2008, she has been developing projects with Jordi Vilardell for different companies.

JOSEP LLUSCÀ

Josep Llusà Martínez er en industridesigner utdannet ved Eina School, med videre studier i Canada og Frankrike. I 1972 etablerte han sitt eget studio, hvor han sammen med et tverrfaglig team har utviklet prosjekter innen møbler, belysning, emballasje og anvendt elektronikk. Han var en drivkraft bak utstillingen Disueño og har også hatt fremtredende stillinger i ADI/FAD, Generalitat og BCD Foundation. Han kombinerer sitt profesjonelle arbeid med undervisning ved Eina. Designene hans har vært vist på både nasjonale og internasjonale utstillinger og har mottatt en rekke priser, blant annet Delta ADI/FAD, Laus, ID Design Award in Furniture og IF Product Design Award. I 1990 ble han tildelt den spanske nasjonale designprisen.

Josep Llusà Martínez is an industrial designer trained at the Eina School, with additional studies in Canada and France. In 1972, he opened his own studio, where he has developed furniture, lighting, packaging, and applied electronics projects, working with a multidisciplinary team. A driving force behind the Disueño exhibition, he has also held prominent positions at ADI/FAD, the Generalitat, and the BCD Foundation. He combines his professional activity with teaching at Eina. His designs have been featured in both national and international exhibitions and have received numerous awards, such as the Delta ADI/FAD, the Laus, the ID Design Award in Furniture, and the IF Product Design Award. In 1990, he was granted the spanish National Design Award.

DEN ENKLESTE MÅTEN Å TA VARE PÅ PLANTENE DINE

THE EASIEST WAY TO TAKE
CARE OF YOUR PLANTS

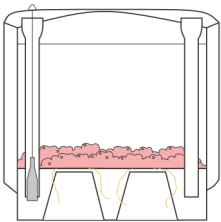

PATENTED SYSTEM®

Patentert selvanningssystem med miljøvennlig profil. Fyll beholderen bare fire ganger i året, og vann overflaten hver fjerde eller femte uke. Resultatet? Praktfulle planter med minimalt vedlikehold.

Self-watering patented system with ecological spirit. Fill the tank only 4 times a year and water it superficially every 4 or 5 weeks. The result? Perfect plants with minimum maintenance.

PLANTE- INSTRUKSJONER PLANTING INSTRUCTIONS

1

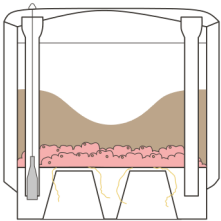

Legg på dreneringslaget
Spread the drainage

Fordel dreneringsmaterialet jevnt over vekene i et lag på omtrent 2 cm.

Spread the drainage bag uniformly on top of the wicks until they are covered by a layer of approximately 2 centimetres.

2

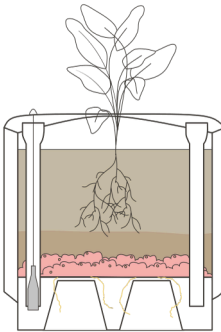

Fyll på jord
Add the soil laye

Legg jord over dreneringslaget, og lag et hull for hver plante i selvvanningspotten. Bruk jord som passer til plantetypen.

Cover the drainage layer with soil, leaving a hole for each plant that you wish to plant in your Hydroplanter. Use the appropriate soil for the desired plant.

3

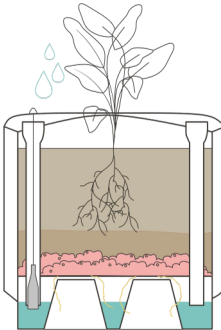

Sett ned planten
Place the plant

Før planting anbefaler vi at du løsner røttene litt, uten å skade dem. Da får de bedre feste i jorden.

Before planting the plant in its corresponding hole we recommend that you loosen the roots (without breaking them) which will encourage the plants to take root ain the new soil.

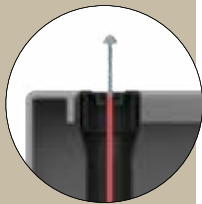

4

Vanning ved første planting:
Watering the first planting:

Ved første planting vannet du jorden langsomt slik at både jord og dreneringslag blir gjennomvåte. Fyll deretter beholderen gjennom påfyllingsrøret. Fyll langsomt til nivåindikatoren viser maksimum (rød markering).

The first planting is done by slowly watering the substrate in order to thoroughly moisten the soil and the drainage. Finish filling the reservoir through the filling tube. Do this slowly to observe when the level indicator reaches the maximum (the red color appears).

BABEL

Babel utforsker møtet mellom tradisjonell katalansk keramikk og moderne digital produksjon. Denne selv vanningspotten er 3D-printet i leire og viser hvordan teknologi kan spille sammen med et tradisjonsrikt materiale.

Babel is a piece that explores the encounter between traditional Catalan ceramics and new digital fabrication techniques. 3D-printed in clay, this hydroplanter shows how technology can engage in dialogue with an ancestral material.

ASHI

Som gamle japanske templer som løftes fra bakken på tresøyler, gir denne kolleksjonen et rolig uttrykk og en lett visuell følelse. Ashi betyr «bein» på japansk.

Like ancient Japanese temples, raised above the ground on wooden pillars, this collection conveys sobriety and a great sense of visual lightness. The word Ashi comes from Japanese and means leg.

CALA

Inspirert av de små strendene langs Middelhavskysten kombinerer CALA varme jordtoner med et elegant og slitesterkt design.

Inspired by the atmospheres of the small beaches along the Mediterranean coast, CALA combines warm earthy tones with an elegant and durable design.
